Date: 03/10/2018

Hiring Manager,

I am graduated as **Master of Design** at **Centre for Product Design and Manufacturing, Indian Institute of Science, Bangalore** recently, on 30th June 2018. While I have comprehensive Computer Science background, my emphasis is on Graphic Design and User Experience. Upon graduating, I hope to work for a firm that specializes in User Experience and Graphics Design. With the right opportunities and experience to cutting edge projects and designs, I believe I can achieve this goal with your firms' help.

I previously had worked with [Accenture Services Private Limited](#). While there, I worked as an Associate Software Developer and my specialization was SAP ABAP development. I also learned the agile process of a project.

I had done internship at [M2D2 lab-IISc](#) & [SID-IISc](#). While there, I was designing User Experience of the application for their product. I **designed screens and information architecture for their service** at M2D2 lab for the endoscopic simulation project. I contributed in **User Research to create the features their interaction** on screens for a mobile app at SID-IISc. This could be of interest to you, as I recently read your website that a User Experience team is a multi-disciplinary team of interaction designers, visual designers, user researchers, copywriters and Web developers who collaborate closely with each other and with engineering and product management to create innovative, usable, great-looking products that people love to use.

I would like to discuss any opportunity you might have. You can reach me by phone or by [email](#).

Sincerely,

Sanket Sanjay Kamble
CPDM, IISc
